

STEEL PIPES AND FITTINGS: To Section SP1 and the following:

| <b>INFORMATION TO BE SUPPLIED</b><br>(See AS 1579 Appendices C&F)                                                                                                                   | <b>PROJECT REQUIREMENTS</b><br>(* See Practices Table of Sections SP1 & SP15) |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------|
| Application (water: potable/non-potable, sewerage, pressure/non-pressure)                                                                                                           |                                                                               |
| Pipes<br>- Nominal size(s) (to Table F1)<br>- Wall thickness and steel grade<br>- Length (exact or random)<br>- Joint type(s)<br>- Angular joint deflection<br>- Coating and lining | -<br>-<br>-<br>- See Schedules and/or project drawings<br>-<br>-              |
| Fittings<br>- Design parameters/ratings<br>- Nominal size(s) (to Table F1)<br>- Type(s) and jointing<br>- Coating and lining                                                        | -<br>-<br>- See Schedules and/or project drawings<br>-                        |
| Welded collar (banded) joints                                                                                                                                                       |                                                                               |
| Flanged joint bolting selection (excluding valves)                                                                                                                                  |                                                                               |
| Flange gaskets, O-rings and lubricants                                                                                                                                              |                                                                               |
| Field joint coatings<br>- Welded joints<br>- Bolted joints                                                                                                                          | -<br>-                                                                        |
| Elastomeric seal material and lubricant                                                                                                                                             | *                                                                             |
| Bactericidal lubricant                                                                                                                                                              |                                                                               |
| Acceptable Product Verification Report                                                                                                                                              | Manufacturers without Product Cert. to supply                                 |
| Certificate of Compliance, to Section SP1                                                                                                                                           | Manufacturer to supply                                                        |
